## HIGH PRESSURE WATER PUMPS

DYNASET HPW high pressure water pump transforms the hydraulic power of a work machine effectively into high pressure water power. Because of high pressure, the pump gives great water power with a small amount of water. To ease up the use of the pump; pump is self-priming, requiring no feed pressure.

Small size, light weight, durable construction and low water consumption make the HPW pump very cost effective. The patented design of the pump is completely free of rotating parts. Compared to other pumps of the same power, the HPW pump is only fraction in size. It can be installed practically in any space in the work machine. The power range of pumps available covers all needs.

The HPW pump is an excellent tool in daily cleaning work and other works, where reliable high pressure water is needed. It is also powerful enough for industrial applications, dust suppression, fire fighting, hydro scaling and other demanding applications.

### DIMENSIONS

MODEL	DIMENSIONS, mm (in)								WEIGHT kg (lbs)
	L	W	H	A	B	C	D	E
